Windows (all versions)

[Eseguibile v3.6.1](#)

Linux

[Eseguibile v0.9beta](#) (32-bit) NEW

On Linux/Unix, you need to make the file executable in order to run it. You can either do this with your desktop's file manager or, at the command line, type:

```
chmod u+x Magiant
```

You should now be able to execute the file as normal. You can do this from the command line by typing:

```
sudo ./Magiant
```

[Codice Sorgente](#) 1.5K

Librerie richieste:

libqt4-core
libqt4-dev
libqt4-gui
qt4-dev-tools
qtdesigner
qt creator
build-essential
libssl-dev

Per la compilazione, eseguire:

```
qmake make
```

In Ubuntu 10.10 sono state identificate le seguenti dipendenze (tra parentesi il nome della libreria per le versioni a 64bit)

libssl.so.0.9.8
libqtgui4
libqt4-network
libqtcore4
libc6 (libc6-amd64)
libstdc++6 (lib64stdc++6)
libgcc1 (lib64gcc1)
zlib1g (lib64z1)
libqt4-dbus
libfontconfig1
libaudio2
libgl2.0-0
libpng12-0
libfreetype6
libsm6
libice6

libxrender1
libxext6
libx11-6
libgl2.0-0
libqt4-xml
libexpat1 (lib64expat1)
libxt6
libxau6
libpcre3
libuuid1
libxcb1
libxdmcp6
